

OMEGA 36M

The Omega 36M is a two-piece modular design with a fully welded core, front and rear. The rear core contains Cobalt 6 and Inconel baffles which provides extreme wear resistance under high heat and heavy fire. The front core consists of new lightweight 17-4 baffle design to save weight while still providing high wear resistance. The titanium outer tube with lock-ring prevents tube

loosening and reduces weight. The 36M is finished with a black Cerakote for a heightened level of durability.

The Omega 36M is rated down to 10" barrels for 223 Remington/5.56mm NATO, 16" barrels for 308 Winchester/7.62mm NATO, and 20" barrels for 300 Win Mag and 338 Lapua Mag.

Omega 36M
SKU SU4735
UPC 816413026625

Tech Specs

CALIBER	5.56 NATO to .338 Lapua Magnum & 9mm
