

# RADIANT 762™

WITH ADAPT™ MODULAR TECHNOLOGY

## LIGHTWEIGHT MODULARITY. LEGENDARY DURABILITY.

The Radiant762 is the pinnacle of lightweight modularity. Combining the use of Cobalt 6 baffles in the main body and grade 5 Titanium baffles in the module means not only is this can lightweight but it also has the durability to be pushed to the limits.

## TOP FEATURES

### Accuracy Proven

We've sent thousands of rounds through our designs to ensure exactitude. Our vetting process gives our suppressors a proven accuracy and provides you with a repeatable zero shift when attaching/detaching your suppressor.

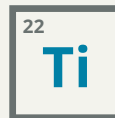

### ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

### Dual Taper Locking System™

Our quick detach mounts feature 2 tapers. The front taper provides a concentric lock up and protects the threads from carbon build up. The rear taper prevents the suppressor from loosening during firing.

### Lightweight High Strength Titanium

The Radiant762 is so strong that it is full-auto rated, surpassing US SOCOM standards - while also being magnum rated for calibers up to 300RUM ; with no barrel length restrictions.

**UNCONDITIONAL  
LIFETIME  
WARRANTY**

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
