

RAZOR 762™

COMPACT SUPPRESSION, MAXIMUM LONGEVITY.

The Razor762™ is developed to have reduced gas blowback and weight savings making it a smart choice for your semi and full-auto platforms. Clocking in at 6.4", the Razor762 offers an alliance of sound suppression and length/weight savings.

TOP FEATURES

Accuracy Proven

We've sent thousands of rounds through our designs to ensure exactitude. Our vetting process gives our suppressors a proven accuracy and provides you with a repeatable zero shift when attaching/detaching your suppressor.

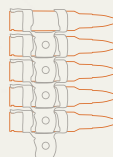

ADAPT™ Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPT™ Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

Dual Taper Locking System™

Our quick detach mounts feature 2 tapers. The front taper provides a concentric lock up and protects the threads from carbon build up. The rear taper prevents the suppressor from loosening during firing.

Belt Fed Rated®

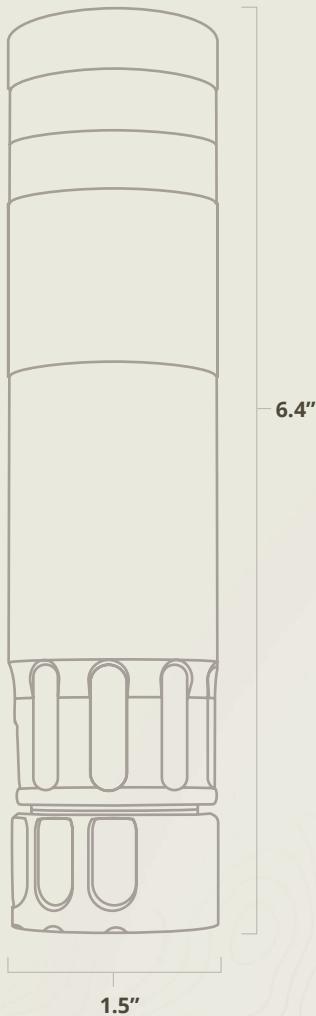

The Razor762 is machined from top of the line materials to not only last a lifetime, but withstand any rate of fire. The Razor762 is Belt Fed Rated® and rated for calibers up to 300RUM; with no barrel length restrictions. Because we believe your gear shouldn't be what's holding you back.

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
